

FIG. 1 is a perspective view of a device 10. The device 10 includes a main body 100 and a cover 200. The main body 100 has a top surface 102 and a side surface 104. The cover 200 is positioned to cover the top surface 102 of the main body 100. The cover 200 includes a top edge 12 and a bottom edge 14. The cover 200 is secured to the main body 100 by a plurality of fasteners 202, which are shown as screws or bolts. The fasteners 202 are located along the bottom edge 14 of the cover 200, where it meets the side surface 104 of the main body 100.

FIG. 4 is a perspective view of the frame 200 of the display device 100, showing the frame 200 in an open position. The frame 200 includes a front bezel 202, a back bezel 208, and a central display area 210. The front bezel 202 and back bezel 208 are connected by hinges 212, 214, and 216. The front bezel 202 is shown in a folded position, revealing the back bezel 208 and the central display area 210. The frame 200 is shown in a perspective view, with the front bezel 202 and back bezel 208 being rectangular and the central display area 210 being a rectangular opening. The hinges 212, 214, and 216 are shown as curved lines connecting the front bezel 202 and back bezel 208. The frame 200 is shown in an open position, with the front bezel 202 and back bezel 208 being separated by the central display area 210.
